## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statement (IDS) submitted on 14 February 2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/466,058. Although the conflicting claims are not identical, they are not patentably distinct from each other because the features of the claims of Application No. 10/466,058 are broad enough to be encompassed by the claims of the instant application and as such it would have been obvious to one of ordinary skill in the art to implement the claims of the Application No. 10/466,058 using the claims of

the instant application in order to effectively manage processing resources of a mobile radio system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 1-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/073,950. Although the conflicting claims are not identical, they are not patentably distinct from each other because the features of the claims of Application No. 10/073,950 are broad enough to be encompassed by the claims of the instant application and as such it would have been obvious to one of ordinary skill in the art to implement the claims of the Application No. 10/073,950 using the claims of the instant application in order to effectively manage processing resources of a mobile radio system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### ***Claim Rejections - 35 USC § 112***

4. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of the limitation "the consumption law" on lines 8-9 of claim 1 lack prior antecedent basis in the claim.

Art Unit: 2686

The limitation "the SRNC to the CRNC" on line 7 of claim 7 lacks antecedent basis in the claim.

The limitation "CRNC" in claims 10 and 11 lacks clear antecedent basis in the claims.
